

# Disclosure Label

## CMEEC (Lowell Aggregation)

Electric power suppliers are required to provide customers with a disclosure label. The label enables consumers to look at the energy sources and air emissions in order to make a more informed choice of a power supplier. Consumers can compare energy labels to make the best choice based on their energy needs.

### Generation Service Price

Price does not include any regulated charges for customer service and delivery.

All kWhs (including usage levels of 250, 500, 1000, 2000, 10,000, 20,000 or 40,000 kWh per month).

The average price is 12.20¢/kWh.

Toll free: (866) 485-5858 or call the Massachusetts Department of Energy Resources at (617) 626-7300 or the Massachusetts Department of Utilities at (617) 305-3500

CMEEC Customer Service

### Power Sources

(January 1, 2017 - December 31, 2017)

The supplier provided electricity with the following resources\*:

	Known Resources	System Power	Total
Total Generation		100.0%	84.7%
Coal		1.6%	1.4%
Oil		0.7%	0.6%
Gas		48.0%	40.6%
Hydro		8.4%	7.1%
Nuclear		30.8%	26.1%
Renewables:			
	Wood	2.9%	2.5%
	Refuse	3.1%	2.6%
	Wind	3.2%	2.7%
	Solar	0.9%	0.7%
	Steam	0.0%	0.0%
	Landfill Gas	0.4%	0.4%
	Methane	0.04%	0.04%
Net Flow over External Ties			16.7%
Pumping Load			-1.4%

\*CMEEC (Lowell Aggregation) procures 100% of its power from the New England Resource Mix

### Air Emissions

(January 1, 2017 - December 31, 2017)

Air emissions from this supplier's electricity mix:

	Supplier's Mix (lbs./MWh)
Carbon Dioxide (CO <sub>2</sub> )	914.45
Nitrogen Oxide (NO <sub>x</sub> )	0.97
Sulfur Dioxide (SO <sub>2</sub> )	1.54

### Labor Information

The NEPOOL generation resource labor characteristics percentages are based on the NEPOOL aggregate generating unit energies reported for the period January 1, 2017 through December 31, 2017	31% of the electricity from System Power came from power sources with union contracts with their employees
---	--

Source: NEPOOL-GIS Public Reports. Labor characteristics were calculated by dividing the number of certificates identified as union labor on the NEPOOL-GIS [2017 GIS Certificate Statistics – by Other Attributes](#) by the total number of certificates by fuel on the [2017 GIS Certificate Statistics – by Fuel](#).

### NOTES

Electricity customers in New England are served by an integrated power grid, not particular generating units. The above information is based in the most recently available information provided via the NEPOOL Generation Information System and the Massachusetts Department of Telecommunications and Energy. CMEEC procures its energy supply through system power contracts and not through individual generating units.
