**EGREMONT ENERGY PROGRAM WILL SAVE RATEPAYERS  
\$9,500 IN ELECTRICITY COSTS OVER SIX MONTHS**

EGREMONT, MA – Egremont residents and business owners will achieve approximately \$9,500 in savings in the first half of 2017, thanks to the newly created Egremont Community Choice Power Supply program.

The Town of Egremont and Colonial Power Group, Inc. are pleased to announce they have entered into a six-month agreement to bring significant energy cost-savings to the town’s residents and small businesses through this initiative. Additionally, this program supports renewable energy as 100 percent of the power supply is offset with Renewable Energy Certificates.

“We recognize that the spikes in the cost of electricity can be burdensome for our residents,” said Director/Sustainability Coordinator Juliette Haas. “We’re pleased to work with Colonial Power to offer Egremont residents and small business owners the opportunity to have a more stable and lower-cost energy option while also fully supporting renewable energy.”

The new program will help more than 600 households as well as small business owners achieve stability and savings on electricity costs. Participating residents and businesses in Egremont will see a savings of about 7 percent in their monthly energy bills and the program will provide a combined savings of nearly \$1,575 per month for the town’s homes and businesses.

“The Egremont Community Choice program provides price stability, local control, and competition while also lowering the burden of energy costs for Egremont’s residents and business community,” said Mark Cappadona, President of Colonial Power Group, Inc. “We commend the members of Egremont’s Board of Selectmen and Sustainability Coordinator Juliette Haas for their forward-thinking approach to energy purchasing. By taking this action, they are helping to save residents and business owners money on their electricity costs.”

Under the Egremont Community Choice Power Supply program, residents will not notice any change in their electricity service. The only discernable difference will be that Hampshire Power of Northampton, Massachusetts, the selected electricity supplier for the Egremont Community Choice program, will be printed under the “Supply Services” heading on monthly bills. Residents and small business owners will continue to receive one bill from National Grid and to send payments to National Grid for processing. There will be no interruption in billing, power, or customer service.

Colonial Power Group is the leading aggregation consulting firm in Massachusetts. Municipal electricity aggregation allows cities and towns to pool the electrical consumption of all ratepayers in their jurisdictions and competitively procure lower cost electricity supply on behalf of the participants. The aggregation allows the municipality to obtain better pricing than individual residents and business owners could due to economies of scale. Colonial Power works with state officials, utility executives, and energy industry leaders to facilitate the purchase of electricity at a rate lower than basic service rates. Since July 2013, Colonial Power has saved households and businesses across New England a total of nearly \$11 million on their electric bills.

Colonial Power Group, which serves more than 60 municipalities in Massachusetts, was chosen to design, implement, and administer the program on behalf of Egremont. Hampshire Power was selected as the electricity supplier through a competitive process. The cost savings for Egremont residents and businesses will begin with the January 2017 meter reads (February 2017 billings).

No action is required by ratepayers to participate in this cost-saving program. The program will be operated on an opt-out basis, meaning that all Egremont residential and business customers currently on National Grid’s basic service will be automatically enrolled into the program unless they choose to opt out.
