THE CITY OF LOWELL'S COMMUNITY CHOICE POWER SUPPLY PROGRAM

You may be paying too much for your electricity! In April 2014, the City of Lowell launched its Community Choice Power Supply Program. This Program is a municipal aggregation which enables local government to combine the purchasing power of its residents and businesses to provide them with an alternative electricity supply option (M.G.L. c. 164, § 134). The City's current supplier is **First Point Power**.

National Grid has identified your account as either: (1) receiving electricity from a third-party supplier or (2) enrolled in their GreenUp program. The City suggests checking your National Grid electric bill to determine your current supplier and rate (per kWh) as the City's Program may be able to help provide some relief.

The City's aggregation rates are fixed **for all rate classes for 36 months** as follows:

Program Product	Term	Rate (Supply Only)	Renewable Energy Content
Standard (default)	December 2024 to December 2027	\$0.15255 per kWh	45% MA Class I RECs above minimum state requirements
Optional Green 5	December 2024 to December 2027	\$0.13655 per kWh	5% MA Class I RECs above minimum state requirements
Optional Green 100	December 2024 to December 2027	\$0.16575 per kWh	100% MA Class I RECs

[Rates apply to service beginning and ending on the days of the month that your meter is read in your service area. This date varies by account.]

Everyone in City is eligible to join this Program and may OPT-IN at any time. Some suppliers have a termination fee for leaving their contract early. **Please check with your current supplier and confirm that you will not incur an exit fee before enrolling in the City's Program.**

For more detailed information about this Program, including how to OPT-IN, please visit colonialpowergroup.com/lowell or call Colonial Power Group, the City's aggregation consultant, at (866) 485-5858 ext. 1. You may OPT-OUT or OPT-IN at any time in the future with NO CHARGE.

The Community Choice Power Supply Program cannot guarantee future savings against National Grid Basic Service as their rates change twice a year or more, depending on rate class.
