MENDON ENERGY PROGRAM ANNOUNCES NEW RATES

MENDON, MA – The Town of Mendon has signed a twenty-four month contract with its current supplier, Direct Energy Services. Beginning with the September 2026 meter reads, the Mendon Community Choice Power Supply Program, designed to meet the specific needs of the Town's electricity ratepayers, will continue to offer the same options but at new rates:

- The standard product which meets the Massachusetts Renewable Energy Requirement (MA Req) plus an additional 10% Massachusetts Class I Renewable Energy Certificates (RECs) at a rate of \$0.16410 per kWh.
- An optional product that meets the MA Req of 69.1% at a rate of \$0.16030 per kWh.
- A second optional product which meets the MA Req plus an additional 25% Massachusetts Class I RECs at a rate of \$0.16990 per kWh.

For Mendon residents and businesses who are enrolled in the Town's standard product, the current rate of \$0.14450 per kWh will expire and the new rate of \$0.16410 per kWh will take effect with the September 2026 meter reads. This represents an increase of \$12 per month on the supply side of the bill given average usage of 600 kWh. However, this new rate is 5 percent lower than National Grid's Residential Basic Service rate of \$0.17185 per kWh. Residents can expect to see an average savings of \$5 per month for the months of September 2026 through January 2027.

Mendon re-launched its electricity program in September 2024 in an effort to develop an energy program that would be stable, affordable and incorporate renewable energy. From inception through March 2026, the Program has saved residents and small businesses over \$170,000 in electricity costs as compared to National Grid Basic Service.

It is important to note that no action is required by current participants. All accounts currently enrolled in the Program will remain with their current product selection and see the new rate and Direct Energy printed under the “Supplier Services” section of their monthly bill. This change will be seen on the October 2026 bills.

The Mendon Community Choice Power Supply Program has no fees or charges. However, anyone switching from a contract with a third-party supplier may be subject to penalties or early termination fees charged by that supplier. Ratepayers should verify terms before switching.

Basic Service rates change twice a year or more, depending on rate class. As a result, the aggregation rate may not always be lower than the Basic Service rate. The goal of the aggregation is to deliver savings over the life of the program against National Grid Basic Service. However, future savings cannot be guaranteed.

National Grid has several programs to help income-eligible families and customers needing special assistance meet their energy needs. To learn more visit nationalgridus.com/MA-Home/Bill-Help/Payment-Assistance-Programs.
